LBA Group's mission statement is to **"consolidate metallurgical and recycling know-how applied to copper and nickel-based alloys in order to respond responsibly to the technical and environmental challenges of user industries"**.

Responding responsibly is reflected within LBA by the implementation of a "BRONZE" policy based on 6 key pillars

- Build Together
- Responsible Purchase
- Optimized performance
- Net zero carbon footprint
- Zero accident
- Eco-Solution

These pillars serve as the basis for creating a relationship of trust with all our partners (customers, employees, shareholders, financial partners and communities). This trust is reinforced by obtaining ISO 9001, EN 9100 and ISO 14001 Group certification.

To be ISO 9001 / EN 9100 certified, we must, in particular:

- Decline our strategy into objectives that must be communicated, relayed and explained to all employees through their managers;
- Monitor common indicators and define actions to improve them;
- Aim for excellence in terms of service quality

To be ISO 14001 certified, we commit to meeting our compliance obligations by protecting our employees and the environment and preventing pollution. We are committed to improving our environmental performance through the following actions:

- Promoting the use of recycled metals through a responsible purchasing policy and by structuring an upcycling activity;
- Develop processes that reduce metal consumption (TPC);
- Controlling energy consumption by working on projects to reduce our carbon emissions with the implementation of a "CAP 30" plan whose objective is to reduce our scope 1 and 2 carbon emissions by 30% by 2030;
- Reduce water consumption
- Reduce our waste (foundry slag, waste, smoke, dust, noise, travel, etc.);

Our quality, safety and environmental management is based on :

- An organisation with dedicated technical teams
- A large involvement of our teams in projects of continuous improvement of our quality, safety and environmental performance;
- Communication of our policy and its implementation to all our partners.
- An investment budget aimed at supporting this policy and reducing our environmental footprint

Alexandra DUMONT NUBERY  
LBA's Executive Director
