About Lebronze alloys

Lebronze alloys is a world leader in the **development** and **fully integrated production** of **high-performance copper and nickel alloys**.

Thanks to a multidisciplinary know-how, the Group provides **innovative solutions to all major industries** such as Aeronautics, Electronics, Space, Automotive, Energy, among others.

Our 6 production facilities and 750 employees manage a **unique range of metal processing technologies**: continuous and semi-continuous casting, extrusion, hot and cold rolling, drawing, open-die forging, hot stamping, closed-die forging, cold forming, machining, non-destructive testing, etc.

The Group's commitment is to find appropriate and **optimized solutions for every sector's requirements while optimizing the environmental impact of our products**.

KEY FIGURES

- 6 production sites
- 3 service centers
- 750 employees
- 200 + alloys produced
- 288 M€ turnover

History of the Group

2006

The DUMONT family, some private investors as well as some key managers, take over "Le Bronze Industriel", a company founded in France in 1934 specializing in copper alloys production. This change of ownerships, with Michel DUMONT as active Chairman, marked a new period of strategic growth for the company.

2012-2016

Period of massive external growth for the company. Several major acquisitions are made such as Inoforges, Swissmetal Lüdenscheid and CLAL. These acquisitions consolidated our metallurgical expertise through a sharing of experience.

2016

Le Bronze Industriel officially becomes Lebronze alloys. It has been 10 years since the buyout and the Group has now tripled its sales.

2020

Opening of our first service center in Europe at Aldridge (UK). This service center joins an already well-established network of distributor partners around the globe and enables us to provide a greater responsiveness to our customers' needs.

2022

Marks the end of a 2-years industrial repositioning allowing the Group to focus on high added value materials.

2023

The Group counts over 750 employees, 6 production sites and 3 service centers around the world and generates 288 M€ of sales.

Our worldwide footprint

- Production plants
- Service centers

Product range at a glance

Lebronze alloys offers **more than 200 copper-based and nickel-based alloys** with unique properties which meet the most complex requirements. We supply these alloys in different forms :

Billets

Bars

Hollow bars

Strips

Sheets

Rods

Wires

Standard
& complex
profiles

Plates

Welding
electrodes

Marine
tubes
& fitting

Machined
blanks
and parts

A fully integrated production process

One of the Group's major strengths relies in its **fully integrated production process**, from smelting to machining and recycling.

This particularity guarantees a traceability, optimization and strict control of the final properties of our materials so they can suit to the most stringent requirements.

Melting & Casting

- Continuous wire casting
- Continuous bar casting
- Semi-continuous casting

Hot forming

- Extrusion
- Hot rolling
- Free forging
- Hot stamping

Cold forming

- Cold rolling
- Drawing straightening
- Cold stamping
- Heat treatments

Finishing

- Machining
- Servicing
- Scrap recovery

Our sustainable development policy

To ensure the sustainability of our business, it is essential to strike the **right balance between economic performance, social impact and environmental impact**.

This balance within the Group is structured around our **6 "Bronze" pillars**. Each pillar is broken down into actions and indicators that enable us to be part of a dynamic of continuous progress and sustainability.

Build together: this pillar covers social initiatives that have a positive impact on gender, sex and age equality, as well as projects that improve the well-being of our teams at work.

Responsible purchase: purchases represent more than 50% of Group sales. It is therefore essential that we implement a responsible purchasing policy and tighten up our requirements of our suppliers.

Optimised performance: the Company's economic, industrial and environmental performance is a key factor in meeting the expectations of our relevant stakeholders.

Net zero carbon footprint: taking into account the major challenge of decarbonation, we have decided to make this a specific pillar and to build a path that meets the transformation of the Climate Act and the Paris Agreement.

Zero accidents: our processes require constant vigilance. We are taking action to anticipate and reduce the risk of accidents as far as possible.

Eco solution: by working in collaboration with our customers and bringing innovations to the market, we are contributing to a more sustainable approach by improving the life cycle of products.

Quality

Lebronze alloys develops for all its activities a formally recognized quality management system which allow to:

- guarantee the traceability of our products, from raw material to the product delivered
- certify our products properties
- control our delivery times

Our state-of-the-art quality checks equipment include:

- **Metallurgical tests** such as traction, resilience, hardness, bending and others
- **Non destructive tests** such as Magnetic Particle Inspection (MPI), ultrasonic contact testing, liquid penetrant Inspection and others
- **Metrology, geometry and surface tests** such as surface metrology, global DEA, profile projectors and others

Our certifications

All our certificates can be consulted on our website

Aerospace certifications

Certified site: Suippes

Heat treating

Certified service center:
Lebronze alloys UK

General certifications

Certified sites: Bornel, Breteuil, Lüdenscheld, Suippes, Rydzyna.

Certified sites: Breteuil, Suippes, Rydzyna.

Certified sites: Lüdenscheld and Suippes.

CuNi alloys

Sea-water resistance alloys

Sea-water and biofouling resistance

Our Group offers copper-nickel alloys **used for sea-water resistance applications**. These alloys exhibit high resistance to sea-water corrosion and to biofouling which provides various advantages compared to other copper alloys and steels

PRODUCT PORTFOLIO		
Alloy	ISO	UNS
Nical® 10-Fe	CuNi ₁₀ FeMn	C70600
Nical® 30-Fe	CuNi ₃₀ FeMn	C71500
Nical® 30A-Fe*	CuNi ₃₀ Mn ₂ Fe ₂	NA
Nical® 30B-Fe*	CuNi ₃₁ FeMn	NA
Nical® 25*	CuNi ₂₅	C71300

**For those alloys, technical data is on demand*

STANDARD CAPABILITY			
Format	Thickness	Width	Length
Strips	0.08 - 3.5 mm	3 - 380 mm	NA
Sheets	0.25 - 3.5 mm	20 - 380 mm*	500 - 3000 mm*

**Dimensions outside this range on request*

ESG Performance

We aim to offer our Customers products with the leading grade of environmental footprint. To achieve this, we make major investments in innovative processes aiming to optimize energy and water consumption and increasing the use of recycled raw materials. More specifically, we have developed state-of-the-art recycling know-how based on specialized purchasers for sourcing end of life materials to be processed in our Group Upcycling Workshop. Another key aspect of our ESG strategy is to offer substitutes for alloys that are not REACH and RoHS compliant.

- Our CuNi alloys are :
- RoHS and REACH compliant
 - Mainly produced from recycled raw materials

Markets and applications

Energy

- Heat exchangers
- Mechanical and piping components
- Submarine cables shielding

Health

- Desalination

Electronics

- Deep drawn cans

Niclal® 10-Fe

CuNi₁₀FeMn

Niclal® 10-Fe is a Copper-Nickel (CuNi₁₀FeMn) alloy produced by Lebronze alloys. It exhibits high resistance to sea-water corrosion and to biofouling which provides various advantages compared to other copper alloys and steels.

Niclal® 30-Fe

CuNi₃₀FeMn

Niclal® 30-Fe is a Copper-Nickel (CuNi₃₀FeMn) alloy produced by Lebronze alloys. It exhibits high resistance to sea-water corrosion and to biofouling which provides various advantages compared to other copper alloys and steels.

MATERIAL DESIGNATION

ISO	UNS	Others
CuNi ₁₀ FeMn	C70600	CW352H

CHEMICAL COMPOSITION

Cu	Ni	Fe
Balance	10%	1.5%

PHYSICAL PROPERTIES

General properties	
Density at 20 °C	8.9 g/cm³
Thermal conductivity	50 W/m.°C
Coefficient of thermal expansion from 20 to 200 °C	17.1 x 10 ⁻⁶ /°C
Modulus of elasticity	126 GPa
Electrical properties	
Resistivity at 20°C	22 µΩ.cm

OTHER AVAILABLE FORMS

Rods
Wire
Bars
Machined parts

STANDARD CAPABILITY

Format	Thickness	Width	Length
Strips	0.08 - 3.5 mm	3 - 380 mm	NA
Sheets	0.25 - 3.5 mm	20 - 380 mm*	500 - 3000 mm*

*Dimensions outside this range on request

TYPICAL APPLICATIONS

Deep drawn cans
Electrical contacts
Heat exchangers and desalination components

COMPATIBLE DOWNSTREAM PROCESS

Cold forming
Deep drawing
Welding (TIG, MIG, Arc)
Brazing
Machining

KEY FEATURES

Sea-water corrosion resistance
Biofouling resistance

MECHANICAL PROPERTIES

Temper	Yield Stength 0.2 % (MPa)	Tensile Stength (MPa)	Elongation (%)	Hardness (HV)
Annealed	≤ 120	≤ 350	≥ 35	≥ 95
½ hard H12	≥ 190	345 - 500	≥ 10	90 - 135
¾ hard H14	≥ 220	495 - 600	≥ 2	130 - 185
